

FLM Fundamentals

A course designed for FLM developers, consultants and support teams

Course Objectives

To provide hands-on practical training to:

- Understand the FLM architecture within the SAP environment
- Design & implement an Adobe forms-based business process
- Create a form using the FLM Form Design Methodology

Course Content

Through the use of a guided case-study, the course covers:

- FLM forms process
- FLM Form Wizard
- Adobe Designer and JavaScript
- FLM configuration
- ABAP business logic
- Form Routing
- Form Render Control
- Forms Posting Engine and Posting Adapters
- FLM Dashboard

Notes

The course concludes with a hands-on case study completed independently by students for FLM Certification.
